General Safety Instructions

- Preparation - study safety data thoroughly so you know it **BEFORE** an accident occurs
- Keep materials MSDS (Material Safety Data Sheets) close at hand
- Kits use concentrated materials and should only be used by persons able to read and understand the instructions.
- Keep all materials out of the reach of children
- Do not eat or drink any material or use in foods
- If you get a material on your skin or eyes, wash off immediately. See below for more specific instructions
- Prompt action will help prevent adverse reactions later
- Keep fire fighting equipment suitable for oil fires in reach of work area

ADVICE TO WASH OFF SKIN : WIPE OFF EXCESS AND USE UNDILUTED HAND DISHWASHING LIQUID (L.O.C., of Amway, is recommended) Rub into the area with essential oil or chemical for a few seconds until thoroughly mixed. Wash off with copious amounts of water. Alcohol will assist to remove materials but will irritate eyes or sensitive areas and is flammable.

ADVICE TO WASH OUT OF EYES : Most perfume companies recommend copious flushing with plain water, however perfumery materials are oily and resist being washed out. We recommend room temperature plain pasteurized or UHT milk (NOT sweetened or flavored). Milk is an emulsion with a fat content that helps to dissolve oils. Keep a small carton of plain UHT milk and an eyeglass near your mixing area. Use the milk as many times as necessary to flush the material out without making the eye sore. Then use plain clean water several times to wash the milk out completely.

ADVICE IN THE EVENT OF INGESTION-EATING : Wash out excess from the mouth and throat by spitting out and gargling with milk or water - always spitting out. Lukewarm is better than cold. General medical advice now is not to induce vomiting. Contact a hospital immediately - seeking advice on the telephone before leaving if this is practical. Go to the 24hr Casualty or Poisons section taking the empty bottle with you for material identification.

DO NOT DELAY - CONSULT A MEDICAL PRACTITIONER
